■ Executive Summary

Overall Health Status: WHO India surveillance shows mixed performance. Measles remains elevated at 14,328 cases while immunization gaps persist in several states.

Key Findings:

- Measles incidence at 10.42 per million — above acceptable threshold
- FIC nationally at 92.08% but Sikkim critically low at 39.3%
- COVID CFR stable at 1.18% with declining transmission
- AFP NPAFP rate 4.82 — exceeds minimum surveillance threshold of 2.0
- 73,265 district participants trained in FR protocols

Critical Alerts:

- Sikkim FIC 39.3% — emergency immunization drive required
- Measles seasonal peak approaching — enhanced surveillance needed

Recommendations:

- Deploy emergency immunization teams to 5 critical states immediately
- Intensify AFP surveillance in UP and Bihar high-burden districts
- Accelerate FR training completion in states below 80% coverage
